Dear Catherine, Paul, Rose and Elsbeth,

I liked the interesting and popular walk. It was interesting because there was lots of artefacts and I loved the ancient tree because it looked very old. I learnt that the old cellar was used as a rubbish dump after the people died. I learnt which year the fragile toys were from when I took part in the time line activity. I liked the cheese press but there was a funny looking piece of metal on the cheese press. We thought it was a caterpillar but no it was not, it was a handle that was used for pushing and squashing the cheese.

I had a really nice time when I came to Under Whitle Farm and I really enjoyed it. I wish that I could come with my parents one day and have a really nice time going on the trail just like I did with school.

From Sophia
