

Online Safety Policy Template for Schools/ Educational Settings

Using the Online Safety Policy Template

An online safety policy provides educational settings with a framework to develop their online safety ethos and enables leaders and managers to detail strategic approaches and considerations, with regards to the safer use of technology.

The online safety policy should be recognised as a safeguarding policy, not a technical or computing policy and falls within the role and responsibilities the Designated Safeguarding Lead (DSL). There is no requirement for educational settings to have a separate online safety policy if online safety issues are appropriately addressed within other policies; this decision will be down to leaders and managers. If online safety is embedded within existing documents, settings should ensure that their school is aware of how and where to locate safety information, especially regarding responding to and reporting specific online safety concerns.

This policy should support a schools/settings acceptable use policy, social media policy/ **remote learning guidance's** and handling complaints made by parents on line using social media.

We encourage all educational settings to ensure that their online safety policy is individualised for their own specific context, to ensure that it is fit for purpose. It will not be appropriate for educational settings to adopt this template in its entirety; some statements will be more relevant to some settings than others.

This policy template requires leaders, managers and DSLs to adapt the content to include specific local information such as their own named points of contact, as well as their specific procedures and expectations. These decisions and details will vary from setting to setting, so this template should be used as a starting framework.

“Insert setting name” or “this school” is a generic term replace accordingly

The Education People make every effort to ensure that the information in this document is accurate and up-to-date. If errors are brought to our attention, we will correct them as soon as practicable.

This policy will be reviewed at least annually. It will also be revised following any concerns and/or updates to national and local guidance or procedure

 - Reinforcing online safety messages whenever technology or the internet is in use.
 - Educating learners in the effective use of the internet to research; including the skills of knowledge location, retrieval and evaluation.
 - Teaching learners to be critically aware of the materials they read and shown how to validate information before accepting its accuracy.
- Hartington School will support learners to read and understand the acceptable use policies in a way which suits their age and ability by:
 - Displaying acceptable use posters in all rooms with internet access.
 - Informing learners that network and internet use will be monitored for safety and security purposes and in accordance with legislation.

- Rewarding positive use of technology.
- Implementing appropriate peer education approaches.
- Providing online safety education and training as part of the transition programme across the key stages and when moving between establishments.
- Seeking learner voice when writing and developing online safety policies and practices, including curriculum development and implementation.
- Using support, such as external visitors, where appropriate, to complement and support our internal online safety education approaches.

5.2 Vulnerable Learners

Settings should include specific information in this section about how their school's needs have been identified and what action has been taken e.g. specific filtering requirements for children with EAL or SEND. This is especially important for special schools or settings with specialist units; policies should reflect the settings circumstances.

- Hartington School recognises that some learners are more vulnerable online due to a range of factors. This may include, but is not limited to children in care, children with Special Educational Needs and Disabilities (SEND) or mental health needs, children with English as an additional language (EAL) and children experiencing trauma or loss.
- Hartington School will ensure that differentiated and ability appropriate online safety education, access and support is provided to vulnerable learners. (Working in unison with the NSPCC, Diocese and Local Authority (LA), cluster schools regarding enrichment programmes including pupil workshops)
- When implementing an appropriate online safety policy and curriculum Hartington School will seek input from specialist staff as appropriate, including the School's SENCO.

5.3 Training and engagement with staff

Hartington School will:

- Provide and discuss the online safety policy and procedures with all members of staff as part of induction.
- Provide up-to-date and appropriate online safety training for all staff, including **governors where relevant to their role on** a regular basis, with at least annual updates.

 - This will cover the potential risks posed to learners (Content, Contact and Conduct) as well as our professional practice expectations.
- Recognise the expertise staff build by undertaking safeguarding training and managing safeguarding concerns and provide opportunities for staff to contribute to and shape online safety policies and procedures.

- Make staff aware that our IT systems are monitored, and that activity can be traced to individual users; staff will be reminded to behave professionally and in accordance with our policies when accessing our systems and devices.

 - Due to the global and connected nature of the internet, it is not possible to guarantee that unsuitable material cannot be accessed via our computers or devices.
- All members of the school and extended community are made aware of our expectations regarding safe and appropriate behaviour online and the importance of not posting any content, comments, images or videos which could cause harm, distress or offence to

- Our decision regarding filtering and monitoring has been informed by a risk assessment, considering our specific needs and circumstances.
- Changes to the filtering and monitoring approach will be risk assessed by staff with educational and technical experience and, where appropriate, with consent from the leadership team; all changes to the filtering policy are logged and recorded.
- The leadership team will ensure that regular checks are made to ensure that the filtering and monitoring methods are effective and appropriate.
- All members of staff are aware that they cannot rely on filtering and monitoring alone to safeguard learners; effective classroom management and regular education about safe and responsible use is essential.
