MEGA ACTIV
COLOUR CODE

Players - Any number!
Equipment - Different colour objects!
Space - Anywhere, any size!

1. Establish a playing area & players stand spread out inside the area. 1 player (Coder) is in charge of the colour code!

2. Players will need to listen to the Coder's command and perform the correct action for each colour.

3. The first colour code is: Green = Jogging, Yellow = Walk, Red = Stop. The Coder can say the colours as many times and in any order they want until they decide to stop.

4. The second colour code introduces 3 new colours: Blue = Hop, Purple = Crawl, Orange = Strike a pose!

5. The final round involves the Coder either saying the colours or showing them using their colour objects. Therefore, the players must be listening to, and watching, the coder at all times!

GAME BOOSTS

Introduce as many new colours as you want!
Play a round where the catcher can only show the colours, not say them!
Change the Coder each round!
How many colours can you add to the code?
