

Hartington C of E Primary School

“Caring & sharing as part of God’s family”
“Loving our neighbour as we love ourselves” - Luke 10:27

Digital continuity statement

A digital continuity statement (DCS), or data retention statement, outlines why and how a school intends to retain data that should be kept for six or more years.

The ability to properly manage digital data is essential for protecting the information schools depend on to function. Correctly managed data allows schools to operate legally, efficiently and effectively.

Schools should manage their information as an asset, ensuring that it is sourced and managed for as long as required. It is important that data remains accessible yet secure, so that it is available to use when necessary in the future, e.g. if legal charges are ever brought against the school.

Records deemed appropriate for the DCS should be identified early in their lifecycle, so the appropriate measures can be taken. Similarly, data that does not require inclusion in the DCS should also be identified early on, to avoid retaining excess data.

Below you will find a template DCS, based on guidance from the Information Records Management Society. It should be amended to suit your school’s approach to data protection and digital continuity.

This policy has been reviewed and approved by the staff and governing body: June 2018

Head teacher’s signature: _____ Date: _____

Chair of Governor’s signature: _____ Date: _____

Date of next review: June 2019

Digital continuity statement template

The purpose and requirements for keeping the data

Hartington C of E Primary School is committed to the protection and security of all data it is required to keep – in some cases this may be beyond a pupil's, staff member's or governor's tenancy at the school. In light of this, Hartington C of E Primary School is required to keep a digital continuity statement pertaining to computerised data that must be kept for six or more years.

Should the school fail to retain this data, legal action may result in financial penalisation and/or negative press; it is for this reason that the school will retain relevant data for as long as it is required.

The information assets to be covered by the statement

The school understands the sensitivity of some data it is required to keep and ensures measures are in place to secure this data, in accordance with the school's Data Protection Policy and the GDPR.

To ensure the safety of the data and records, Hartington C of E Primary School will not store any data on flash drives (memory sticks) unless it is encrypted. Hartington C of E Primary School understands the importance and sensitivity of some data and sees the use of flash drives as inappropriate due to the fact they can be easy to corrupt, lose or steal. Data will be stored on password protected external hard drives.

The individuals responsible for the data preservation

Data retention will be overseen by the following personnel:

- Person responsible for the digital continuity strategy, e.g. the head teacher and SLT
- Information asset owners (LA & DfE)

Should the any of the above personnel change, appropriate updates will be made to this and other affected policies and correspondence.

The appropriate supported file formats for long-term preservation, and when they need to be transferred

As agreed with the head teacher and SLT, Microsoft Word documents will be converted into PDF/CTF files, to ensure the longevity of their accessibility – file formats should be converted as soon as possible, or within six months, to ensure their compatibility. Further specifications of file conversion are listed below:

Type of file	To be converted to
Microsoft Word document	PDF/CTF
Microsoft PowerPoint document	PDF

Microsoft Excel document	PDF
Images	JPEG
Videos and film, including CCTV	MOV/MP4

The retention of all software specification information and licence information

If it is not possible for the data created by an unsupported computer system to be converted to the supported file formats, the system itself should be 'mothballed' to preserve the files it has stored. If this is the case with any data, Hartington C of E Primary School will list the complete system specification for the software that has been used and any licence information which will allow the system to be retained in its entirety.

Data will be stored on password protected external hard drives, which will be kept in a locked filing cabinet – only the school business officer and the head teacher will have knowledge of these passwords

How access to the information asset is to be managed in accordance with the GDPR

To ensure the data's relevance to the school, and that recent files have been correctly converted, Hartington C of E Primary School, DCC & DfE will undertake regular archive checks of the data – timeframes are listed in the table below. In accordance with principle five of the GDPR, personal data should be "kept in a form which permits the identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed". Hartington C of E Primary School is committed to ensuring all data is checked regularly to ensure its relevance.

Timeframe	Type of check
Biannually	Relevance check
Annually	Compatibility check and, if required, back-up files created
At the end of the data's lifecycle (at least every six years)	Check to ensure data is securely disposed of
