# MEGA ACTIVE RETRIEVAL

Players - Any number!  
Equipment - Small objects that can be stood on e.g book/magazines  
Space - Anywhere, any size!

1. Establish a square playing area & spread the objects equally in the area. Players stand on the outside of the area and choose a base.
2. Players will need to retrieve objects at the same time however, they cannot touch the ground inside the area.
3. When an object is retrieved, players take it to their base & then they can retrieve their next object. If they touch the inside of the area, they must put an object from their base back into the area.
4. Players can use the objects they retrieve to make a path to reach central objects. Be careful though, as other players can steal your objects from your path if you're not looking. Objects are only safe if they are in your base.
5. The player with the most objects in their base when the area is empty is the winner!

## GAME BOOSTS

Increase or decrease: size of the area, number of objects, and value of certain objects!  
1 Player: time how quickly it takes to retrieve all the objects; beat your PB!  
Do it in teams against each other!
